WE CARE SPA SIGNATURE TREATMENTS

Colonics (Colon Hydrotherapy):

30-45 minutes - \$70

The colonic exercises the colon and stimulates peristalsis (*the breakdown and release of toxic waste, bile, mucus and debris that are lodged deeply in this important organ*). Our colon hydrotherapists use a closed system to flush out the toxins. The treatment is painless and an important cornerstone of your cleanse.

Digestive Release:

+20 minutes - \$45

Light abdominal massage to stimulate your colon and may increase the productivity of your colonic by 80%.

System Recovery:

90 minutes - \$220 • Series of 3 - \$190

The healing properties of castor oil benefit more than just the digestive track; when applied in this complete body wrap it begins working through your whole system. Improvements are seen in liver function, fluid retention, arthritis, and colonic release. While you relax on our heated amethyst mat, your therapist will give you a relaxing scalp and foot massage.

Magnesium Detox:

60 minutes - \$125 • 90 minutes - \$175

This wrap may relieve your stress and calm your overactive nerves. First, your entire body is brushed with a dry brush. Then, a magnesium and aloe paste is applied topically for increased trans-dermal absorption. The treatment is performed on an amethyst mat and you are encased in a FAR infra-red sauna wrap. While wrapped, enjoy a scalp and shoulder massage which ends with lotion application.

Raindrop Therapy:

75 minutes - \$140

Synergistically combines 9 therapeutic grade essential oils to simultaneously kill viral and bacterial pathogens. The technique is meditative; oils are dropped in sequence (*like raindrops*) along the spinal column then feathered out along neural pathways using the Tibetan Vita Flex technique.

Intramuscular Vitamin Therapy:

10 minutes - \$125

Intramuscular Vitamin Therapy works through the administration of vitamins and nutrients directly into the bloodstream via a shot by a certified practitioner. This delivery into the body bypasses the digestive system which provides increased cell absorption and 100% bioavailability of the vitamins. Choose from one of the following packages, or consider additional enhancements:

Bright Eyed Boost: A great alternative (or addition) to your daily energy regimen! Our B vitamin mix with added Inositol & Choline Chloride increases energy and stamina. The Bright Eyed Boost is great for chronic fatigue or anyone needing a quick “pick me up”.

Vital C Boost: Power up your immune system with this amazing cocktail! Good for cold sores, cold and flu viruses, and immune support. Super immune has all the components of our traditional injections with an added boost of Vitamin C!

Skinny Shot: Methionine Inositol Choline (MIC) Injections, also referred to as Lipotropic Injections, are used to help release fat throughout the body by specifically targeting its primary fatty deposits.

Liver Lover: Glutathione, aka “the great protector”! This injection works by enhancing the body’s ability to remove free radicals and detoxify the liver. Great for those looking to bolster their body’s toxin removal.

Happy Shot: With the addition of B12 vitamins to the mix, added taurine and magnesium, this is a great shot if you’re looking to increase your energy, brain function, focus and combat mood changes while detoxing.

LED Therapy, also known as low level laser therapy (LLLT), is exposing the body to certain colors (wavelengths) that encourage healing (wounds, tendons, muscles, nerves, bones) and reduces inflammation and pain. This treatment is 100% non-invasive. LED is known to increase collagen and elastin production which helps to diminish wrinkles, acne, and pigmentation. LED improves the health of joints, tendons, and bones.
